

Public Question

Written question 1 from S Morgan, resident of the Borough:

“In October EEBC issued an abatement notice to Skip It Waste Management Ltd with regard to statutory noise nuisance from their industrial recycling trommel. The noise since has fluctuated from considerable noise nuisance to occasion lulls. The noise, crashing and banging continues to affect lifestyles and sleep patterns.

Taking into account the evidence of continued noise nuisance, the regular out of hours activity carried out by the operators (videos have been provided), plus the fact that they working without an enclosed building so the trommel noise is very intrusive, what steps are EEBC going to take to protect local residents and further the abatement process – a process that hasn't stopped the operator from doing exactly what they want so far.”
